Technology for your supply chain

Armada's Supply Chain Technology Platform provides real-time visibility across your entire supply chain and automates activities enabling an agile network that delivers competitive advantages.

## Visibility

Real-time, end-to-end visibility coupled with master data management enables proactive decision making and fosters information sharing.

+

## Automation

An integrated technology platform automates activities enabling the execution of your supply chain with improved speed, reliability and control.

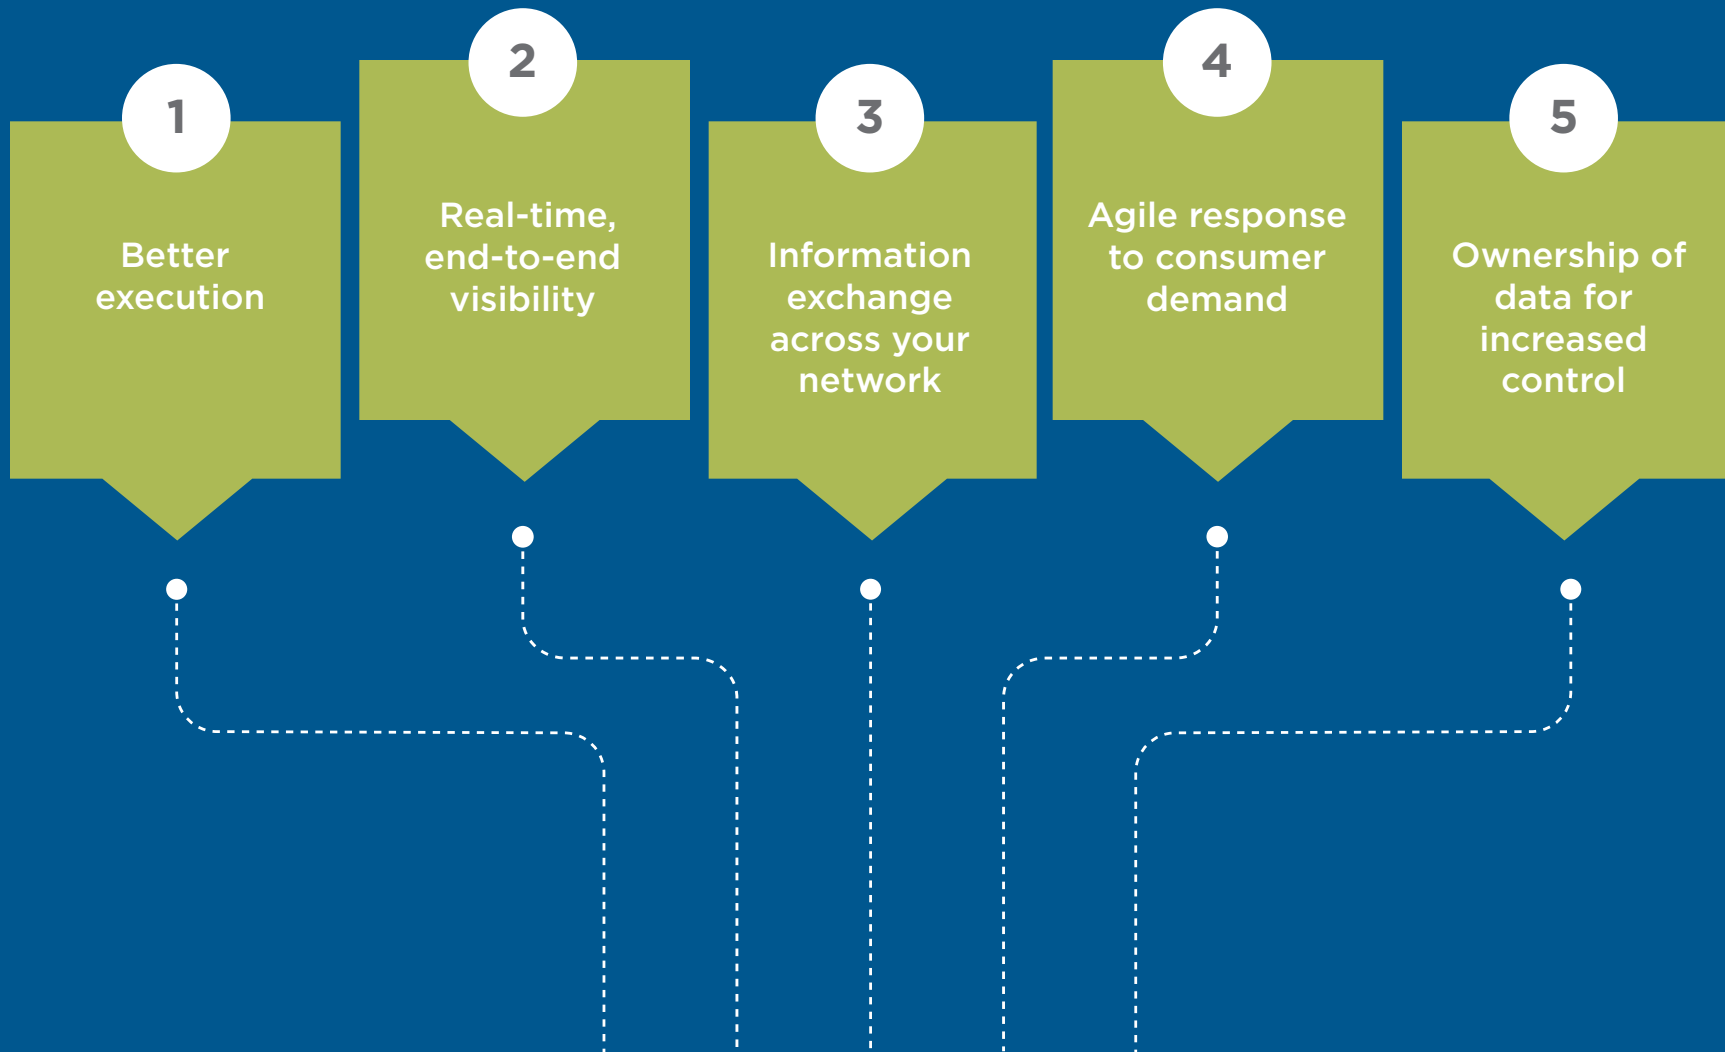

=

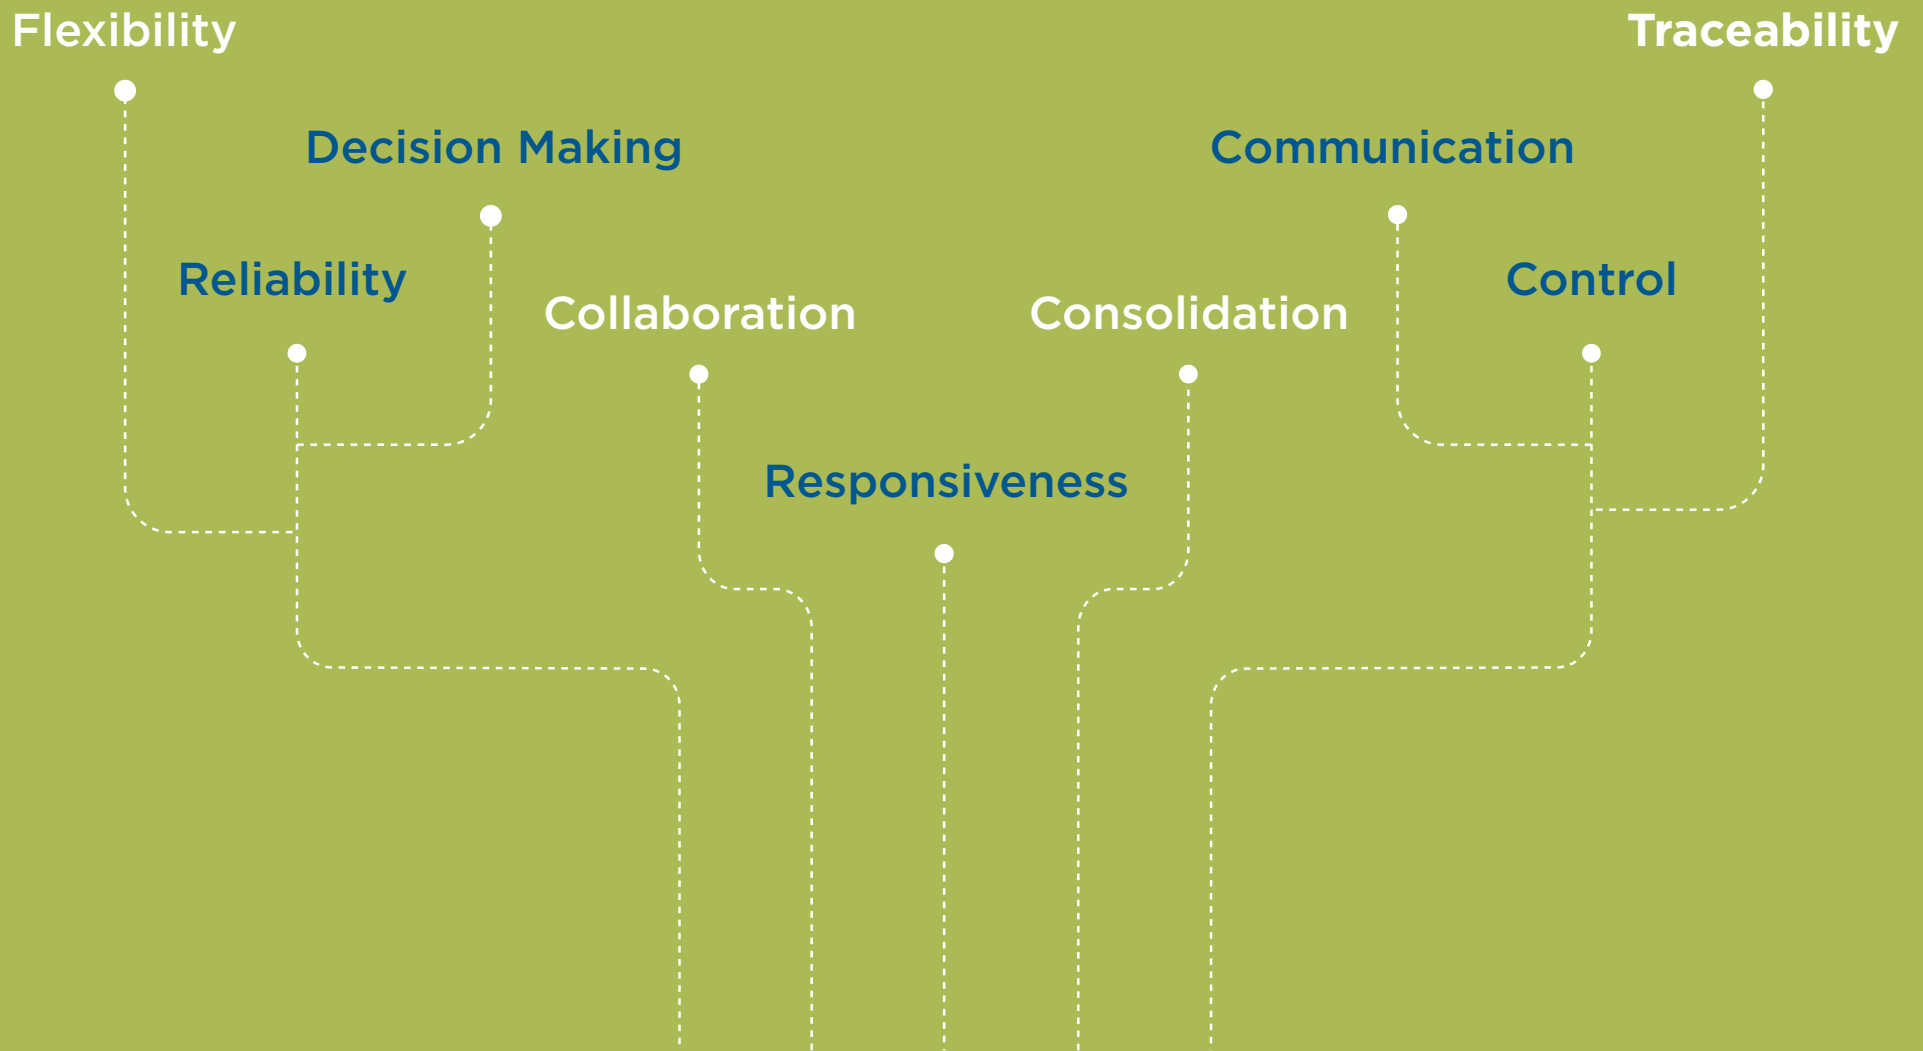

## Agility

Visibility and automation are the foundation of an agile supply chain that drives efficiencies and allows for the responsiveness needed to meet constantly changing demand and supply trends.
